

## **DETAILS OF BUSINESS**

Bandaram Pharma Packtech Ltd decided to foray into paper industry and has been successfully running the business since 2022. Due to increased activity in this line of work, the computer sales and AMC business was slowly discontinued and the company today has only one line of activity, viz, processing and supply of recycled paper. The company supplies various categories of recycled paper, both imported and indigenous, to small and medium size paper mills, located mainly in the East & West Godavari Districts of Andhra Pradesh. Bandaram Pharma Packtech Ltd has firmly established itself as a reputable supplier and has entered into long term supply contracts with several manufacturers of recycled paper.

There are 10 people employed in the company's production process and there are about 5 people in administration, marketing and management. This recycled paper consists of consumer waste paper such as old newspapers, notebooks and other textbooks, exercise books, forms and all types of discarded paper. Collection is done by hawkers and dealers who consolidate collections from the small individual shops and supply to paper manufacturers for pulping. Before pulping, the recycled paper is required to be sorted and baled. Our processes ensure that only the best quality feedstock enters the production processes and this leads to better quality product for the manufacturers.
